QUESTION PAPER

Computer Science [SHIFT - 1]

Exam Date : 19/01/2025

Time : 10:00 AM - 12:00 PM

Part I - Aptitude

Question 1

Question Id : 251

Directions: *Study the following passage to answer the question that follows.*

Passage

In terms of the total energy consumed, the largest consumer is understandably the industrial sector which accounts for nearly half the total energy used in the country today. This is followed by the transport sector which consumes about 25%, the household sector (about 14%) and the agricultural sector (about 9%), in that order. This last sector has shown considerable increase in energy use over the last four decades. Among the primary fuels, the relative proportion of coal has dropped from nearly 80% to 40% and that of oil has gone up from 17% to 44% over the same period.

Total consumption of energy in India today is equivalent to 291 million tons of oil. Of this 26% comes from wood. On a per capita basis it works out to about one litre of oil per day, which is extremely low by international standards. The future energy demand depends upon the level of development envisaged and also on the sections of people affected by it. There is clearly no escape from the utilisation of renewable energy sources in a big way if the gap between the desired levels of energy supply and available resources has to be kept at the minimum.

Which of the following styles has been adopted by the author in writing the passage?

Answer :

Option Id

(A) Data-based, objective, positive, solution-oriented — 251001

(B) Data-based, but coloured by socialism — 251002

(C) Highly subjective with bias for poor people — 251003

(D) Objective, descriptive, lacking clarity — 251004

Right Answer :

Data-based objective positive solution-oriented

Right Option Id : 251001

Question 2

Question Id : 252

Directions: *Study the following passage to answer the question that follows.*

Passage

In terms of the total energy consumed, the largest consumer is understandably the industrial sector which accounts for nearly half the total energy used in the country today. This is followed by the transport sector which consumes about 25%, the household sector (about 14%) and the agricultural sector (about 9%), in that order. This last sector has shown considerable increase in energy use over the last four decades. Among the primary fuels, the relative proportion of coal has dropped from nearly 80% to 40% and that of oil has gone up from 17% to 44% over the same period.

Total consumption of energy in India today is equivalent to 291 million tons of oil. Of this 26% comes from wood. On a per capita basis it works out to about one litre of oil per day, which is extremely low by international standards. The future energy demand depends upon the level of development envisaged and also on the sections of people affected by it. There is clearly no escape from the utilisation of renewable energy sources in a big way if the gap between the desired levels of energy supply and available resources has to be kept at the minimum.

The author feels that increasing per capita use of energy is

Answer :

Option Id

(A) not at all desirable. — 252001

(B) a matter of meticulous planning. — 252002

(C) not easy but certainly achievable. — 252003

(D) rather difficult, but not impossible. — 252004

Right Answer :

a matter of meticulous planning.

Right Option Id : 252002

Question 3

Question Id : 253

Directions: *Study the following passage to answer the question that follows.*

Passage

In terms of the total energy consumed, the largest consumer is understandably the industrial sector which accounts for nearly half the total energy used in the country today. This is followed by the transport sector which consumes about 25%, the household sector (about 14%) and the agricultural sector (about 9%), in that order. This last sector has shown considerable increase in energy use over the last four decades. Among the primary fuels, the relative proportion of coal has dropped from nearly 80% to 40% and that of oil has gone up from 17% to 44% over the same period.

Total consumption of energy in India today is equivalent to 291 million tons of oil. Of this 26% comes from wood. On a per capita basis it works out to about one litre of oil per day, which is extremely low by international standards. The future energy demand depends upon the level of development envisaged and also on the sections of people affected by it. There is clearly no escape from the utilisation of renewable energy sources in a big way if the gap between the desired levels of energy supply and available resources has to be kept at the minimum.

Which of the following statements is true?

Answer :

Option Id

(A) Industrial sector uses 50% of total energy used in India. 253001

(B) Energy consumption in India is 26% of world consumption. 253002

(C) The household sector has shown considerable increase in energy use. 253003

(D) Use of oil has increased from 40% to 80%. 253004

Right Answer :

Industrial sector uses 50% of total energy used in India.

Right Option Id : 253001

Question 4

Question Id : 254

Directions: *Study the following passage to answer the question that follows.*

Passage

In terms of the total energy consumed, the largest consumer is understandably the industrial sector which accounts for nearly half the total energy used in the country today. This is followed by the transport sector which consumes about 25%, the household sector (about 14%) and the agricultural sector (about 9%), in that order. This last sector has shown considerable increase in energy use over the last four decades. Among the primary fuels, the relative proportion of coal has dropped from nearly 80% to 40% and that of oil has gone up from 17% to 44% over the same period.

Total consumption of energy in India today is equivalent to 291 million tons of oil. Of this 26% comes from wood. On a per capita basis it works out to about one litre of oil per day, which is extremely low by international standards. The future energy demand depends upon the level of development envisaged and also on the sections of people affected by it. There is clearly no escape from the utilisation of renewable energy sources in a big way if the gap between the desired levels of energy supply and available resources has to be kept at the minimum.

Which of the following has been suggested by the author as the best possible solution to overcome energy crisis?

Answer :

Option Id

(A) Exploration of oil reserves 254001

(B) Maximization of renewable sources 254002

(C) Importing large quantities of coal 254003

(D) Reducing share of bulk users 254004

Right Answer :

Maximization of renewable sources

Right Option Id : 254002

Question 5

Question Id : 255

Directions: *Study the following passage to answer the question that follows.*

Passage

In terms of the total energy consumed, the largest consumer is understandably the industrial sector which accounts for nearly half the total energy used in the country today. This is followed by the transport sector which consumes about 25%, the household sector (about 14%) and the agricultural sector (about 9%), in that order. This last sector has shown considerable increase in energy use over the last four decades. Among the primary fuels, the relative proportion of coal has dropped from nearly 80% to 40% and that of oil has gone up from 17% to 44% over the same period.

Total consumption of energy in India today is equivalent to 291 million tons of oil. Of this 26% comes from wood. On a per capita basis it works out to about one litre of oil per day, which is extremely low by international standards. The future energy demand depends upon the level of development envisaged and also on the sections of people affected by it. There is clearly no escape from the utilisation of renewable energy sources in a big way if the gap between the desired levels of energy supply and available resources has to be kept at the minimum.

Which of the following has been mentioned as a major hurdle in enhancing per capita consumption of energy in India?

Answer :

Option Id

(A) Present level of development in India. 255001

(B) International norm of 1 litre of oil per day per person. 255002

(C) Disparity in use of energy in rural and urban areas. 255003

(D) None of these 255004

Right Answer :

None of these

Right Option Id : 255004

Question 6

Question Id : 256

A Cricket team travelled by bus at 50 km per hour for 3 hours and 17 minutes. Then due to some fault in the bus, they decided to travel the remaining distance to reach their destination by train which also took 3 hours 17 minutes. If the speed of the train is 60 km/hour, the average speed of the whole journey is _____.

Answer :

Option Id

(A) 35 km/hr. 256001

(B) 45 km/hr. 256002

(C) 55 km/hr. 256003

(D) 50 km/hr. 256004

Right Answer :

55 km/hr.

Right Option Id : 256003

Question 7

Question Id : 257

A and B can separately do a piece of work in 20 and 15 days respectively. They worked together for 6 days, after which B was replaced by C. If the work was finished in next 4 days, then the number of days in which C alone could do the work will be _____.

Answer :

Option Id

(A) 60 days 257001

(B) 40 days 257002

(C) 35 days 257003

(D) 30 days 257004

Right Answer :

40 days

Right Option Id : 257002

Question 8

Question Id : 258

Three girls are aged 2 years, 4 years and 8 years. They want to divide seventy rupees in the ratio of their ages. How much money would each get?

Answer :

Option Id

(A) Rs.15, Rs.20, Rs.35 258001

(B) Rs.12, Rs.22, Rs.36 258002

(C) Rs.16, Rs.24, Rs.30 258003

(D) Rs.10, Rs.20, Rs.40 258004

Right Answer :

Rs.10 Rs.20 Rs.40

Right Option Id : 258004

Question 9

Question Id : 259

While selling an electric fan, a dealer gives a discount of 5%. If he gives a discount of 8%, he earns Rs.36 less as profit. The marked price of the fan is _____.

Answer :

Option Id

(A) Rs.1000 259001

(B) Rs.1200 259002

(C) Rs.800 259003

(D) Rs.600 259004

Right Answer :

Rs.1200

Right Option Id : 259002

Question 10

Question Id : 260

The number of two-digit numbers which on being reversed (i.e., their digits exchanged the position) gives out perfect square two-digit numbers is/are _____.

Answer :

Option Id

(A) 6 260001

(B) 4 260002

(C) 1
(D) 10

260003
260004

Right Answer :
6

Right Option Id : 260001

Question 11

Question Id : 261

Find the odd one out.
F9G, G8H, H7I, I6J, I5K, K4L

Answer :

Option Id

(A) G8H — 261001
(B) I5K — 261002
(C) I6J — 261003
(D) K4L — 261004

Right Answer :
I5K

Right Option Id : 261002

Question 12

Question Id : 262

Seema is married to Vidu. Vidu is the brother-in-law of Amrita. Lokesh who is son of Vidu is a male cousin of Mukesh. Amit is the father of Seema's only sister Amrita's son. How is Lokesh related to Amit?

Answer :

Option Id

(A) Father-in-law — 262001
(B) Brother-in-law — 262002
(C) Nephew — 262003
(D) Can't be determined — 262004

Right Answer :
Can't be determined

Right Option Id : 262004

Question 13

Question Id : 263

In a certain code, MOBILE is written as OMIBEL. How is TELEVISION written in that code?

Answer :

Option Id

(A) ETELVIISNO — 263001
(B) ETELVIISON — 263002
(C) ETELIVISNO — 263003
(D) ETLEVIISON — 263004

Right Answer :
ETELIVISNO

Right Option Id : 263003

Question 14

Question Id : 264

The present ages of A and B are in the ratio of 9:4. Seven years hence, the ratio of their ages will be 5:3. Find the present ages of A and B?

Answer :

Option Id

(A) 18 and 8 — 264001
(B) 27 and 12 — 264002
(C) 45 and 20 — 264003
(D) 36 and 16 — 264004

Right Answer :
18 and 8

Right Option Id : 264001

Question 15

Question Id : 265

In the last election, the ruling party got 55% of the total valid votes cast. 20% of the votes cast were invalid. If the total number of votes cast was 7500, what is the number of valid votes that the other parties got?

Answer :

Option Id

(A) 2250 — 265001
(B) 2700 — 265002
(C) 2750 — 265003
(D) 2800 — 265004

Right Answer :
2700

Right Option Id : 265002

Question 16

Question Id : 266

Which of the following is a physical change?

Answer :

Option Id

(A) Oxidation — 266001
(B) Reduction — 266002
(C) Sublimation — 266003
(D) Decomposition — 266004

Right Answer :
Sublimation

Right Option Id : 266003

Question 17

Question Id : 267

Which of the following places in India is known as Jain Temple City?

Answer :

Option Id

(A) Girnar — 267001
(B) Varanasi — 267002
(C) Prayagraj — 267003
(D) None of these — 267004

Right Answer :
Girnar

Right Option Id : 267001

Question 18

Question Id : 268

Mahatma Gandhi started Satyagraha movement in 1919 in protest against the

Answer :

Option Id

(A) Simon Commission. — 268001
(B) Champaran wrongs. — 268002
(C) proposed Rowlatt Act. — 268003
(D) colonial exploitation of India. — 268004

Right Answer :
proposed Rowlatt Act.

Right Option Id : 268003

Question 19

Question Id : 269

Who appoints/elects the Chairman of Public Accounts Committee (PAC) of the Parliament?

Answer :

Option Id

(A) Union Cabinet of India — 269001
(B) Speaker of Lok Sabha — 269002

testbook
GET IT ON Google Play

(C) President of India
(D) Members of PAC

269003
269004

Right Answer :
Speaker of Lok Sabha

Right Option Id : 269002

Question 20

Question Id : 270

In which of the following banks one cannot open a personal account?

Answer :

Option Id

(A) Commercial Bank — 270001
(B) Cooperative Bank — 270002
(C) Scheduled Bank — 270003
(D) Reserve Bank of India — 270004

Right Answer :
Reserve Bank of India

Right Option Id : 270004

Question 21

Question Id : 271

Directions: *Study the following information and answer the question that follows.*

In a custom component making unit, two machine components P and Q are made using three different types of tools – for pressing, cutting and welding. The unit has 6 Presses, 10 Cutters and 5 Welding tools, all working for 10 hours a day.
One unit of part P needs 40 minutes on Press, 2 hours on Cutter, and 30 minutes on a Welding tool for its completion. Similarly, one unit of part Q needs 1 hour on Press, 30 minutes on Cutter and 1 hour on Welding tool for its completion.

In a day, how many units of machine component Q can be completed?

Answer :

Option Id

(A) 20 — 271001
(B) 30 — 271002
(C) 40 — 271003
(D) 50 — 271004

Right Answer :
50

Right Option Id : 271004

Question 22

Question Id : 272

Directions: *Study the following information and answer the question that follows.*

In a custom component making unit, two machine components P and Q are made using three different types of tools – for pressing, cutting and welding. The unit has 6 Presses, 10 Cutters and 5 Welding tools, all working for 10 hours a day.
One unit of part P needs 40 minutes on Press, 2 hours on Cutter, and 30 minutes on a Welding tool for its completion. Similarly, one unit of part Q needs 1 hour on Press, 30 minutes on Cutter and 1 hour on Welding tool for its completion.

If 20 units of component Q are made in a day, how many units of component P can be made in the same day?

Answer :

Option Id

(A) 10 — 272001
(B) 20 — 272002
(C) 40 — 272003
(D) 45 — 272004

Right Answer :
45

Right Option Id : 272004

Question 23

Question Id : 273

testbook

Directions: *Study the following information and answer the question that follows.*

In a custom component making unit, two machine components P and Q are made using three different types of tools – for pressing, cutting and welding. The unit has 6 Presses, 10 Cutters and 5 Welding tools, all working for 10 hours a day.
One unit of part P needs 40 minutes on Press, 2 hours on Cutter, and 30 minutes on a Welding tool for its completion. Similarly, one unit of part Q needs 1 hour on Press, 30 minutes on Cutter and 1 hour on Welding tool for its completion.

If 10 units of component P are made in a day, how many units of component Q can be made in the same day?

Answer :

Option Id

(A) 45 — 273001
(B) 30 — 273002
(C) 17 — 273003
(D) 50 — 273004

Right Answer :
45

Right Option Id : 273001

Question 24

Question Id : 274

Directions: *Study the following information and answer the question that follows.*

In a custom component making unit, two machine components P and Q are made using three different types of tools – for pressing, cutting and welding. The unit has 6 Presses, 10 Cutters and 5 Welding tools, all working for 10 hours a day.
One unit of part P needs 40 minutes on Press, 2 hours on Cutter, and 30 minutes on a Welding tool for its completion. Similarly, one unit of part Q needs 1 hour on Press, 30 minutes on Cutter and 1 hour on Welding tool for its completion.

If one more Welding tool is added and 30 units of component Q are made in a day, how many units of component P can be made?

Answer :

Option Id

(A) 10 — 274001
(B) 5 — 274002
(C) 2 — 274003
(D) 0 — 274004

Right Answer :
0

Right Option Id : 274004

Question 25

Question Id : 275

Directions: *Study the following information and answer the question that follows.*

In a custom component making unit, two machine components P and Q are made using three different types of tools – for pressing, cutting and welding. The unit has 6 Presses, 10 Cutters and 5 Welding tools, all working for 10 hours a day.
One unit of part P needs 40 minutes on Press, 2 hours on Cutter, and 30 minutes on a Welding tool for its completion. Similarly, one unit of part Q needs 1 hour on Press, 30 minutes on Cutter and 1 hour on Welding tool for its completion.

If only component Q is to be made, which type of single tool should be bought, so that there is a maximum increase in production capacity?

Answer :

Option Id

(A) Press — 275001
(B) Cutter — 275002
(C) Welding tool — 275003
(D) Any one — 275004

Right Answer :
Welding tool

Right Option Id : 275003

Part II - Technical

Question 26

Question Id : 276

Which method allows for continuous changes and is widely adopted for remote or distributed work?

Answer :

Option Id

(A) Agile Method — 276001

(B) Waterfall Method — 276002
(C) Lean Method — 276003
(D) Six Sigma — 276004

Right Answer :
Agile Method

Right Option Id : 276001

Question 27

Question Id : 277

What is a mathematical model for data types defined by their behavior and operations, rather than their implementation details?

Answer : Option Id

(A) Abstract Data Type (ADT) — 277001
(B) Primitive Data Type — 277002
(C) Composite Data Type — 277003
(D) Object-Oriented Data Type — 277004

Right Answer :
Abstract Data Type (ADT)

Right Option Id : 277001

Question 28

Question Id : 278

What is an algorithm?

Answer : Option Id

(A) A programming language — 278001
(B) A set of steps to complete a task — 278002
(C) A type of software — 278003
(D) A machine instruction — 278004

Right Answer :
A set of steps to complete a task

Right Option Id : 278002

Question 29

Question Id : 279

Which layer is responsible for controlling the operation of the subnet and managing packet routing in a network?

Answer : Option Id

(A) The Network Layer — 279001
(B) The Transport Layer — 279002
(C) The Data Link Layer — 279003
(D) The Application Layer — 279004

Right Answer :
The Network Layer

Right Option Id : 279001

Question 30

Question Id : 280

What is the attack called where data is introduced into a DNS resolver's cache, causing it to return incorrect IP addresses and divert traffic?

Answer : Option Id

(A) DNS Spoofing — 280001
(B) Phishing — 280002
(C) Man-in-the-Middle Attack — 280003
(D) IP Spoofing — 280004

Right Answer :
DNS Spoofing

Right Option Id : 280001

GET IT ON Google Play

Question 31

Question Id : 281

What is a group of objects sharing common properties for data and program parts called in object-oriented programming?

Answer :

Option Id

(A) Object — 281001
(B) Method — 281002
(C) Class — 281003
(D) Attribute — 281004

Right Answer :

Class

Right Option Id : 281003

Question 32

Question Id : 282

What term refers to the process in which a method in Java calls itself continuously?

Answer :

Option Id

(A) Recursion — 282001
(B) Iteration — 282002
(C) Exception Handling — 282003
(D) Polymorphism — 282004

Right Answer :

Recursion

Right Option Id : 282001

Question 33

Question Id : 283

Which systems tolerate missed deadlines with degraded performance, rather than causing a disaster?

Answer :

Option Id

(A) Hard Real-Time Systems — 283001
(B) Embedded Systems — 283002
(C) Time-Sharing Systems — 283003
(D) Soft Real-Time Systems — 283004

Right Answer :

Soft Real-Time Systems

Right Option Id : 283004

Question 34

Question Id : 284

What term refers to a collection of related data items organized to represent meaningful information?

Answer :

Option Id

(A) Field — 284001
(B) Record — 284002
(C) File — 284003
(D) Tuple — 284004

Right Answer :

Record

Right Option Id : 284002

Question 35

Question Id : 285

Which type of computer is the smallest general-purpose processing system and includes desktops and portables?

Answer :

Option Id

(A) Microcomputers — 285001
(B) Mainframe Computers — 285002
(C) Supercomputers — 285003

(D) Minicomputers — 285004

Right Answer :
Microcomputers

Right Option Id : 285001

Question 36

Question Id : 286

What are the four practices of integrating design thinking in strategic innovation?

Answer : Option Id

(A) Reviewing, Simulating, Conversing, Collaborating — 286001
(B) Designing, Prototyping, Testing, Implementing — 286002
(C) Planning, Developing, Analyzing, Feedback — 286003
(D) Ideating, Reflecting, Communicating, Collaborating — 286004

Right Answer :
Reviewing Simulating Conversing Collaborating

Right Option Id : 286001

Question 37

Question Id : 287

Which type of data structure uses pointers or links to associate elements sequentially, allowing dynamic memory allocation and flexible operations?

Answer : Option Id

(A) Array — 287001
(B) Linked Lists — 287002
(C) Stack — 287003
(D) Queue — 287004

Right Answer :
Linked Lists

Right Option Id : 287002

Question 38

Question Id : 288

Which term refers to a high-level description of an algorithm, more structured than plain English but less detailed than a program?

Answer : Option Id

(A) Flowchart — 288001
(B) Program — 288002
(C) Pseudocode — 288003
(D) Algorithm — 288004

Right Answer :
Pseudocode

Right Option Id : 288003

Question 39

Question Id : 289

Which layer is responsible for breaking data into smaller units, ensuring error-free delivery, and isolating upper layers from hardware changes?

Answer : Option Id

(A) The Network Layer — 289001
(B) The Data Link Layer — 289002
(C) The Transport Layer — 289003
(D) The Application Layer — 289004

Right Answer :
The Transport Layer

Right Option Id : 289003

Question 40

Question Id : 290

Which type of attack uses a trial-and-error method to generate multiple guesses to obtain sensitive data like passwords?

Answer :

Option Id

(A) Phishing — 290001
(B) Brute Force — 290002
(C) DNS Spoofing — 290003
(D) Social Engineering — 290004

Right Answer :
Brute Force

Right Option Id : 290002

Question 41

Question Id : 291

What term refers to the stage where participants build and experiment with an idea, conduct surveys, and use tools like journey mapping to improve the design?

Answer :

Option Id

(A) Testing — 291001
(B) Prototype — 291002
(C) Ideation — 291003
(D) Implementation — 291004

Right Answer :
Prototype

Right Option Id : 291002

Question 42

Question Id : 292

What keyword in Java is used for memory management and belongs to the class rather than an instance of the class?

Answer :

Option Id

(A) Final — 292001
(B) Static — 292002
(C) Abstract — 292003
(D) Synchronized — 292004

Right Answer :
Static

Right Option Id : 292002

Question 43

Question Id : 293

What is the process that involves monitoring and managing errors in a system to prevent malfunctioning?

Answer :

Option Id

(A) Debugging — 293001
(B) Exception Handling — 293002
(C) Fault Tolerance — 293003
(D) Error Handling — 293004

Right Answer :
Error Handling

Right Option Id : 293004

Question 44

Question Id : 294

What is the highest level of abstraction in a database system, which describes only part of the database to simplify user interaction?

Answer :

Option Id

(A) View Level — 294001
(B) Logical Level — 294002
(C) Physical Level — 294003
(D) Conceptual Level — 294004

testbook
GET IT ON Google Play

Right Answer :
View Level

Right Option Id : 294001

Question 45

Question Id : 295

Which type of computer is characterized by extremely large storage capacity, very high computing speeds, and is used for tasks like weather analysis?

Answer : Option Id

(A) Minicomputer 295001
(B) Microcomputer 295002
(C) Mainframe Computer 295003
(D) Supercomputer 295004

Right Answer :
Supercomputer

Right Option Id : 295004

Question 46

Question Id : 296

According to the Theory of Thinking Modes, which thinking mode involves separating things from visible relationships in processes and production?

Answer : Option Id

(A) Analytical Thinking 296001
(B) Judicial Thinking 296002
(C) Synthetic Thinking 296003
(D) Critical Thinking 296004

Right Answer :
Analytical Thinking

Right Option Id : 296001

Question 47

Question Id : 297

In a linked list, what does the pointer variable 'head' typically store?

Answer : Option Id

(A) The data value of the first node 297001
(B) The address of the last node 297002
(C) The total number of nodes in the list 297003
(D) The address of the first node 297004

Right Answer :
The address of the first node

Right Option Id : 297004

Question 48

Question Id : 298

What term refers to the amount of memory an algorithm needs to complete its execution?

Answer : Option Id

(A) Time Complexity 298001
(B) Performance Evaluation 298002
(C) Algorithm Efficiency 298003
(D) Space Complexity 298004

Right Answer :
Space Complexity

Right Option Id : 298004

Question 49

Question Id : 299

Which layer in the TCP/IP model is responsible for connecting the host to the network to send IP packets?

Answer :

Option Id

(A) The Transport Layer — 299001
(B) The Application Layer — 299002
(C) The Network Layer — 299003
(D) The Host-to-Network Layer — 299004

Right Answer :
The Host-to-Network Layer

Right Option Id : 299004

Question 50

Question Id : 300

Which type of malicious program disguises itself as a normal application but executes harmful code in the background when opened?

Answer :

Option Id

(A) Ransomware — 300001
(B) Spyware — 300002
(C) Trojan Horse — 300003
(D) Worm — 300004

Right Answer :
Trojan Horse

Right Option Id : 300003

Question 51

Question Id : 301

What is the process of wrapping up data and functions into a single unit in object-oriented programming called?

Answer :

Option Id

(A) Data Encapsulation — 301001
(B) Data Abstraction — 301002
(C) Data Hiding — 301003
(D) Data Integration — 301004

Right Answer :
Data Encapsulation

Right Option Id : 301001

Question 52

Question Id : 302

What are the modifiers in Java that specify the accessibility (scope) of a data member, method, constructor, or class?

Answer :

Option Id

(A) Non-access Modifiers — 302001
(B) Access Modifiers — 302002
(C) Static Modifiers — 302003
(D) Final Modifiers — 302004

Right Answer :
Access Modifiers

Right Option Id : 302002

Question 53

Question Id : 303

Which program in Linux acts as an interpreter to execute operating system commands and perform various operations?

Answer :

Option Id

(A) Kernel — 303001
(B) Terminal — 303002
(C) Shell — 303003
(D) GUI — 303004

Right Answer :
Shell

Right Option Id : 303003

Question 54

Question Id : 304

What term refers to the overall design of a database, which changes infrequently and defines the structure and types of data?

Answer :

Option Id

(A) Instance — 304001
(B) Schemas — 304002
(C) Tables — 304003
(D) Records — 304004

Right Answer :

Schemas

Right Option Id : 304002

Question 55

Question Id : 305

Which storage medium is an example of secondary memory used for storing large amounts of data and programs?

Answer :

Option Id

(A) RAM — 305001
(B) Cache Memory — 305002
(C) Floppies — 305003
(D) Registers — 305004

Right Answer :

Floppies

Right Option Id : 305003

Question 56

Question Id : 306

According to the Theory of Thinking Modes, which thinking mode focuses on combining ideas and concepts to create new processes or combinations?

Answer :

Option Id

(A) Analytical Thinking — 306001
(B) Judicial Thinking — 306002
(C) Synthetic Thinking — 306003
(D) Logical Thinking — 306004

Right Answer :

Synthetic Thinking

Right Option Id : 306003

Question 57

Question Id : 307

Which data structure follows the Last-In-First-Out (LIFO) principle, where elements are pushed and popped, and may experience overflow or underflow?

Answer :

Option Id

(A) Queue — 307001
(B) Stack — 307002
(C) Linked List — 307003
(D) Array — 307004

Right Answer :

Stack

Right Option Id : 307002

Question 58

Question Id : 308

What term describes the highest degree term of a formula for running time, focusing on how the running time grows as the input size increases?

Answer :

Option Id

testbook
GET IT ON Google Play

(A) Order of Growth	308001
(B) Time Complexity	308002
(C) Space Complexity	308003
(D) Execution Time	308004

Right Answer :
Order of Growth

Right Option Id : 308001

Question 59

Question Id : 309

Which type of media provides a physical conduit for signals between devices and includes twisted-pair cable, coaxial cable, and fiber-optic cable?

Answer :	Option Id
(A) Unguided Media	309001
(B) Wireless Media	309002
(C) Digital Media	309003
(D) Guided Media	309004

Right Answer :
Guided Media

Right Option Id : 309004

Question 60

Question Id : 310

What is the method called that bypasses the normal authentication process, often created by developers for troubleshooting purposes?

Answer :	Option Id
(A) Keylogger	310001
(B) Ransomware	310002
(C) Backdoors	310003
(D) Spyware	310004

Right Answer :
Backdoors

Right Option Id : 310003

Question 61

Question Id : 311

In machine learning, which component involves creating general concepts and models from stored data?

Answer :	Option Id
(A) Data Storage	311001
(B) Abstraction	311002
(C) Generalization	311003
(D) Evaluation	311004

Right Answer :
Abstraction

Right Option Id : 311002

Question 62

Question Id : 312

In machine learning, which geometric model segments the instance space using geometric concepts like lines or planes to classify data?

Answer :

Option Id

(A) Distance-based Models — 312001
(B) Non-linear Models — 312002
(C) Linear Models — 312003
(D) Clustering Models — 312004

Right Answer :
Linear Models

Right Option Id : 312003

Question 63

Question Id : 313

What is the purpose of the elif keyword in shell scripting?

Answer :

Option Id

(A) It defines a loop — 313001
(B) It creates an alternative condition in an if statement — 313002
(C) It terminates a script — 313003
(D) It checks for multiple conditions — 313004

Right Answer :
It creates an alternative condition in an if statement

Right Option Id : 313002

Question 64

Question Id : 314

What data model uses entities and relationships among these entities to represent real-world objects in database design?

Answer :

Option Id

(A) Relational Model — 314001
(B) Entity-Relationship Model — 314002
(C) Network Model — 314003
(D) Object-Oriented Model — 314004

Right Answer :
Entity-Relationship Model

Right Option Id : 314002

Question 65

Question Id : 315

What controls the timing of processor circuits and divides instruction execution into sequences of basic steps?

Answer :

Option Id

(A) Instruction Register (IR) — 315001
(B) Program Counter (PC) — 315002
(C) Arithmetic Logic Unit (ALU) — 315003
(D) Processor Clock — 315004

Right Answer :
Processor Clock

Right Option Id : 315004

Question 66

Question Id : 316

What term refers to a representative data point that is used in situations where the centroid is not applicable, such as in cases like image data?

Answer :

Option Id

(A) Centroid — 316001
(B) Mode — 316002
(C) Medoid — 316003
(D) Mean — 316004

testbook
GET IT ON Google Play

Right Answer :
Medoid

Right Option Id : 316003

Question 67

Question Id : 317

Which data structure is commonly implemented using an array with two variables, front and rear, to manage insertion and deletion?

Answer :

Option Id

(A) Queue — 317001
(B) Stack — 317002
(C) Linked List — 317003
(D) Priority Queue — 317004

Right Answer :
Queue

Right Option Id : 317001

Question 68

Question Id : 318

What is the formal way to describe the growth rate of an algorithm's running time, focusing on its behavior as the input size increases?

Answer :

Option Id

(A) Asymptotic Notation — 318001
(B) Performance Evaluation — 318002
(C) Time Complexity — 318003
(D) Space Complexity — 318004

Right Answer :
Asymptotic Notation

Right Option Id : 318001

Question 69

Question Id : 319

Which type of cable uses a central core conductor enclosed in insulation and a metallic outer conductor that acts as both a shield against noise and the second conductor?

Answer :

Option Id

(A) Twisted-Pair Cable — 319001
(B) Fiber-Optic Cable — 319002
(C) Coaxial Cable — 319003
(D) Shielded Twisted-Pair Cable — 319004

Right Answer :
Coaxial Cable

Right Option Id : 319003

Question 70

Question Id : 320

What term refers to the protection of sensitive, private information from unauthorized access?

Answer :

Option Id

(A) Integrity — 320001
(B) Authentication — 320002
(C) Availability — 320003
(D) Confidentiality — 320004

Right Answer :
Confidentiality

Right Option Id : 320004

Question 71

Question Id : 321

In machine learning, which type of model forms a single global model over the entire instance space, as opposed to breaking it into segments or groups?

Answer :

Option Id

(A) Decision Trees — 321001
(B) K-Nearest Neighbors (KNN) — 321002
(C) Grading Models — 321003
(D) Grouping Models — 321004

Right Answer :
Grading Models

Right Option Id : 321003

Question 72

Question Id : 322

What type of learning involves an agent discovering which actions yield the most reward through trial and error, without being explicitly told how to correct mistakes?

Answer :

Option Id

(A) Supervised Learning — 322001
(B) Unsupervised Learning — 322002
(C) Reinforcement Learning — 322003
(D) Semi-supervised Learning — 322004

Right Answer :
Reinforcement Learning

Right Option Id : 322003

Question 73

Question Id : 323

What refers to the different stages that a process goes through during execution, based on its current activity?

Answer :

Option Id

(A) Process Queues — 323001
(B) Process States — 323002
(C) Process Scheduling — 323003
(D) Process Management — 323004

Right Answer :
Process States

Right Option Id : 323002

Question 74

Question Id : 324

What type of language enables users to access and manipulate data within a database, including retrieval, insertion, deletion, and modification?

Answer :

Option Id

(A) Data Definition Language — 324001
(B) Data Manipulation Language — 324002
(C) Structured Query Language — 324003
(D) Query Language — 324004

Right Answer :
Data Manipulation Language

Right Option Id : 324002

Question 75

Question Id : 325

Which method is used to obtain the 2's complement of a binary number?

Answer :

Option Id

(A) Subtracting 1 from the binary number — 325001
(B) Adding 1 to the 1's complement of the binary number — 325002
(C) Reversing the order of all bits in the binary number — 325003
(D) Doubling the binary number — 325004

testbook
GET IT ON Google Play

Right Answer :
Adding 1 to the 1's complement of the binary number

Right Option Id : 325002

Question 76

Question Id : 326

What term refers to a language processor that directly executes operations specified in the source program, rather than producing a separate target program?

Answer :

Option Id

(A) Compiler — 326001
(B) Interpreter — 326002
(C) Assembler — 326003
(D) Linker — 326004

Right Answer :
Interpreter

Right Option Id : 326002

Question 77

Question Id : 327

Which sorting algorithm repeatedly compares successive elements and swaps them if they are out of order, often requiring many comparisons and swaps to sort the list?

Answer :

Option Id

(A) Quick Sort — 327001
(B) Merge Sort — 327002
(C) Bubble Sort — 327003
(D) Selection Sort — 327004

Right Answer :
Bubble Sort

Right Option Id : 327003

Question 78

Question Id : 328

What is the time complexity of the Merge Sort algorithm?

Answer :

Option Id

(A) O(n) — 328001
(B) O(n log n) — 328002
(C) $O(n^2)$ — 328003
(D) O(log n) — 328004

Right Answer :
O(n log n)

Right Option Id : 328002

Question 79

Question Id : 329

Which type of electromagnetic waves, used for communication, are unidirectional and require aligned sending and receiving antennas?

Answer :

Option Id

(A) Radio Waves — 329001
(B) Infrared Waves — 329002
(C) X-Rays — 329003
(D) Microwaves — 329004

Right Answer :
Microwaves

Right Option Id : 329004

Question 80

Question Id : 330

Which type of active attack involves an intruder pretending to be an authorized user to gain unauthorized access or privileges?

Answer :

Option Id

(A) Masquerade — 330001
(B) Phishing — 330002
(C) Denial of Service (DoS) — 330003
(D) Eavesdropping — 330004

Right Answer :
Masquerade

Right Option Id : 330001

Question 81

Question Id : 331

What component of a compiler reads characters from the source program and groups them into tokens?

Answer :

Option Id

(A) Syntax Analyzer — 331001
(B) Lexical Analyzer — 331002
(C) Code Generator — 331003
(D) Optimizer — 331004

Right Answer :
Lexical Analyzer

Right Option Id : 331002

Question 82

Question Id : 332

Which method in Java is used to request garbage collection for reclaiming unused memory?

Answer :

Option Id

(A) gc() method — 332001
(B) delete() method — 332002
(C) free() method — 332003
(D) finalize() method — 332004

Right Answer :
gc() method

Right Option Id : 332001

Question 83

Question Id : 333

What contains the information associated with a specific process, such as its state, program counter, CPU registers, and I/O status?

Answer :

Option Id

(A) Process Scheduler — 333001
(B) Process Control Block — 333002
(C) Memory Management Unit — 333003
(D) System Control Block — 333004

Right Answer :
Process Control Block

Right Option Id : 333002

Question 84

Question Id : 334

What term refers to the portion of DML used specifically for retrieving information from a database?

Answer :

Option Id

(A) Data Definition Language — 334001
(B) Query Language — 334002
(C) Data Manipulation Language — 334003
(D) Structured Query Language — 334004

Right Answer :
Query Language

Right Option Id : 334002

Question 85

Question Id : 335

Which flag in the 8086 microprocessor is set when there is a carry from the lower nibble?

Answer :

Option Id

(A) Auxiliary Carry Flag (AC) 335001

(B) Zero Flag (Z) 335002

(C) Parity Flag (P) 335003

(D) Sign Flag (S) 335004

Right Answer :

Auxiliary Carry Flag (AC)

Right Option Id : 335001

Question 86

Question Id : 336

Which command does the parser use to request the next token from the lexical analyzer during the token identification process?

Answer :

Option Id

(A) getToken() 336001

(B) fetchToken() 336002

(C) nextToken() 336003

(D) getNextToken() 336004

Right Answer :

getNextToken()

Right Option Id : 336004

Question 87

Question Id : 337

Which sorting algorithm selects the smallest element from the remaining list and swaps it with the current element until the entire list is sorted?

Answer :

Option Id

(A) Quick Sort 337001

(B) Merge Sort 337002

(C) Selection Sort 337003

(D) Bubble Sort 337004

Right Answer :

Selection Sort

Right Option Id : 337003

Question 88

Question Id : 338

What is the time complexity of the Quick Sort algorithm in the average case?

Answer :

Option Id

(A) O(n log n) 338001

(B) $O(n^2)$ 338002

(C) O(log n) 338003

(D) O(n) 338004

Right Answer :

O(n log n)

Right Option Id : 338001

Question 89

Question Id : 339

Which error-detection technique appends redundant bits to a data unit, making it divisible by a predetermined binary number?

Answer :

Option Id

testbook
GET IT ON Google Play

(A) Parity Check	339001
(B) Checksum	339002
(C) Hamming Code	339003
(D) Cyclic Redundancy Check (CRC)	339004

Right Answer :
Cyclic Redundancy Check (CRC)

Right Option Id : 339004

Question 90

Question Id : 340

Which type of attack involves intercepting and listening to messages exchanged between two entities, especially if the data is unencrypted?

Answer :	Option Id
(A) Spoofing	340001
(B) Eavesdropping (tapping)	340002
(C) Man-in-the-Middle Attack	340003
(D) Phishing	340004

Right Answer :
Eavesdropping (tapping)

Right Option Id : 340002

Question 91

Question Id : 341

In the context of lexical analysis, which function is used to install a lexeme (pointed to by yytext) into the symbol table and return a pointer to it?

Answer :	Option Id
(A) installID0()	341001
(B) installNum()	341002
(C) installToken()	341003
(D) addSymbol()	341004

Right Answer :
installID0()

Right Option Id : 341001

Question 92

Question Id : 342

What term refers to a sequence of characters in the source program that matches the pattern for a token and is identified by the lexical analyzer?

Answer :	Option Id
(A) Lexeme	342001
(B) Token	342002
(C) Syntax	342003
(D) Identifier	342004

Right Answer :
Lexeme

Right Option Id : 342001

Question 93

Question Id : 343

What term describes the execution of multiple smaller tasks within a single process, allowing the program to continue running even when some threads are blocked?

Answer :

Option Id

(A) Parallel Processing — 343001
(B) Concurrency — 343002
(C) Task Scheduling — 343003
(D) Multithreading — 343004

Right Answer :
Multithreading

Right Option Id : 343004

Question 94

Question Id : 344

What term refers to ensuring that a value in one relation corresponds to a valid value in another relation, maintaining consistency between related data?

Answer :

Option Id

(A) Entity Integrity — 344001
(B) Domain Integrity — 344002
(C) Referential Integrity — 344003
(D) Data Integrity — 344004

Right Answer :
Referential Integrity

Right Option Id : 344003

Question 95

Question Id : 345

What term is used to describe the transfer of data between computer registers, such as MAR, PC, and IR?

Answer :

Option Id

(A) Instruction Execution — 345001
(B) Register Transfer — 345002
(C) Memory Access — 345003
(D) Data Bus Communication — 345004

Right Answer :
Register Transfer

Right Option Id : 345002

Question 96

Question Id : 346

In the context of the theory of computation, what type of proof consists of a sequence of statements leading from a hypothesis to a conclusion based on their truth?

Answer :

Option Id

(A) Inductive Proof — 346001
(B) Deductive Proof — 346002
(C) Proof by Contradiction — 346003
(D) Constructive Proof — 346004

Right Answer :
Deductive Proof

Right Option Id : 346002

Question 97

Question Id : 347

Which sorting algorithm uses the divide-and-conquer method, dividing the array into smaller sub-arrays based on pivot elements and recursively sorting them?

Answer :

Option Id

(A) Merge Sort — 347001
(B) Quick Sort — 347002
(C) Bubble Sort — 347003
(D) Selection Sort — 347004

testbook
GET IT ON Google Play

Right Answer :
Quick Sort

Right Option Id : 347002

Question 98

Question Id : 348

Which algorithm adds the cheapest edge and the node it leads to, provided the node is not already in the spanning tree?

Answer :

Option Id

(A) Dijkstra's Algorithm — 348001
(B) Prim's Algorithm — 348002
(C) Kruskal's Algorithm — 348003
(D) Bellman-Ford Algorithm — 348004

Right Answer :
Prim's Algorithm

Right Option Id : 348002

Question 99

Question Id : 349

What is the technique called where an acknowledgment (ACK) frame is included in the header of a data frame traveling in the same direction?

Answer :

Option Id

(A) Sliding Window — 349001
(B) Piggybacking — 349002
(C) Full Duplexing — 349003
(D) Frame Interleaving — 349004

Right Answer :
Piggybacking

Right Option Id : 349002

Question 100

Question Id : 350

What type of malware remains dormant until triggered by a specific event or activity, such as a date or the launch of a program?

Answer :

Option Id

(A) Worm — 350001
(B) Trojan Horse — 350002
(C) Ransomware — 350003
(D) Logic Bomb — 350004

Right Answer :
Logic Bomb

Right Option Id : 350004

Question 101

Question Id : 351

What represents an instantaneous description of a system in finite automata, containing all the necessary information to determine future behavior?

Answer :

Option Id

(A) Transition — 351001
(B) Input — 351002
(C) State — 351003
(D) Output — 351004

Right Answer :
State

Right Option Id : 351003

Question 102

Question Id : 352

Which keyword in Java is used as a reference variable to refer to the immediate parent class object?

Answer :

Option Id

(A) super — 352001
(B) this — 352002
(C) parent — 352003
(D) base — 352004

Right Answer :
super

Right Option Id : 352001

Question 103

Question Id : 353

In which scheduling method is the CPU assigned to a process and not released until that process finishes?

Answer :

Option Id

(A) Preemptive Scheduling — 353001
(B) Round-Robin Scheduling — 353002
(C) Non-Preemptive Scheduling — 353003
(D) Priority Scheduling — 353004

Right Answer :
Non-Preemptive Scheduling

Right Option Id : 353003

Question 104

Question Id : 354

What term is used for an attribute that can be split into smaller components?

Answer :

Option Id

(A) Simple Attribute — 354001
(B) Derived Attribute — 354002
(C) Composite Attribute — 354003
(D) Key Attribute — 354004

Right Answer :
Composite Attribute

Right Option Id : 354003

Question 105

Question Id : 355

Which instruction adds two decimal numbers in Binary Coded Decimal (BCD) format?

Answer :

Option Id

(A) ADDI — 355001
(B) ADDF — 355002
(C) ADDD — 355003
(D) SUBD — 355004

Right Answer :
ADDD

Right Option Id : 355003

Question 106

Question Id : 356

What is a key characteristic of a Deterministic Finite Automaton (DFA)?

Answer :

Option Id

(A) It can have multiple ways to process the input string. — 356001
(B) It reads the input string one symbol at a time and has only one unique way to process it. — 356002
(C) It processes the input string using a probabilistic model. — 356003
(D) It accepts or rejects the input string based on random decisions. — 356004

Right Answer :
It reads the input string one symbol at a time and has only one unique way to process it.

Right Option Id : 356002

Question 107

Question Id : 357

Which search algorithm uses backtracking to explore all nodes along a path before moving to the next path?

Answer :

Option Id

(A) Breadth First Search (BFS) 357001
(B) Dijkstra's Algorithm 357002
(C) A* Search 357003
(D) Depth First Search (DFS) 357004

Right Answer :
Depth First Search (DFS)

Right Option Id : 357004

Question 108

Question Id : 358

Which method is used for problems like job sequencing with deadlines, minimum cost spanning trees, and the 0/1 knapsack problem?

Answer :

Option Id

(A) Dynamic Programming 358001
(B) Greedy Method 358002
(C) Backtracking 358003
(D) Divide and Conquer 358004

Right Answer :
Greedy Method

Right Option Id : 358002

Question 109

Question Id : 359

What technique improves bandwidth utilization by allowing the sender to transmit multiple frames before waiting for an acknowledgment?

Answer :

Option Id

(A) Sliding Window 359001
(B) Full Duplexing 359002
(C) Piggybacking 359003
(D) Pipelining 359004

Right Answer :
Pipelining

Right Option Id : 359004

Question 110

Question Id : 360

What is the act of obtaining secrets and information without permission or knowledge of the holder, often for personal, economic, political, or military advantage?

Answer :

Option Id

(A) Phishing 360001
(B) Hacking 360002
(C) Cyber Espionage 360003
(D) Ransomware 360004

Right Answer :
Cyber Espionage

Right Option Id : 360003

Question 111

Question Id : 361

Which statement is used to access all elements of the standard C++ library without prefixing them with std::?

Answer :

Option Id

(A) #include <iostream> 361001

(B) #include <stdlib.h> 361002

(C) int main() 361003

(D) using namespace std; 361004

Right Answer :

using namespace std;

Right Option Id : 361004

Question 112

Question Id : 362

What in Java is used as a blueprint for a class, has static constants and abstract methods, and is used to achieve abstraction and multiple inheritance?

Answer :

Option Id

(A) Abstract Class 362001

(B) Enum 362002

(C) Class 362003

(D) Interface 362004

Right Answer :

Interface

Right Option Id : 362004

Question 113

Question Id : 363

What term refers to the number of jobs completed by the CPU within a specific time period?

Answer :

Option Id

(A) Waiting Time 363001

(B) Turnaround Time 363002

(C) Throughput 363003

(D) Response Time 363004

Right Answer :

Throughput

Right Option Id : 363003

Question 114

Question Id : 364

What type of relationship occurs when one entity is associated with multiple entities of another type, and vice versa, such as students enrolling in many courses and courses having many students?

Answer :

Option Id

(A) One-to-One 364001

(B) One-to-Many 364002

(C) Many-to-One 364003

(D) Many-to-Many 364004

Right Answer :

Many-to-Many

Right Option Id : 364004

Question 115

Question Id : 365

Which method for designing a control unit uses trigger points activated after gaps of one T-state, avoiding the inefficiency of multiple delay elements?

Answer :

Option Id

(A) Delay Element Method 365001

(B) Microprogrammed Control Method 365002

(C) Sequence Counter Method 365003

(D) Hardwired Flowchart Method 365004

testbook
GET IT ON Google Play

Right Answer :
Sequence Counter Method

Right Option Id : 365003

Question 116

Question Id : 366

In the context of a Deterministic Finite Automaton (DFA), which of the following symbols represents the set of input symbols or alphabet?

Answer :	Option Id
(A) Q	366001
(B) Σ	366002
(C) δ	366003
(D) F	366004

Right Answer :
Σ

Right Option Id : 366002

Question 117

Question Id : 367

What function is used to place data into a hash table and retrieve it using the same function, returning an integer called the hash key?

Answer :	Option Id
(A) Sorting Function	367001
(B) Comparison Function	367002
(C) Search Function	367003
(D) Hash Function	367004

Right Answer :
Hash Function

Right Option Id : 367004

Question 118

Question Id : 368

What term refers to a closed loop in a graph that visits each vertex exactly once and returns to the starting point?

Answer :	Option Id
(A) Eulerian Cycle	368001
(B) Hamiltonian Cycle	368002
(C) Spanning Tree	368003
(D) Directed Acyclic Graph	368004

Right Answer :
Hamiltonian Cycle

Right Option Id : 368002

Question 119

Question Id : 369

Which system coordinates access to a shared communication network by allowing nodes to transmit data whenever available, handling collisions when they occur?

Answer :	Option Id
(A) CSMA/CD	369001
(B) Token Ring	369002
(C) TDMA	369003
(D) ALOHA	369004

Right Answer :
ALOHA

Right Option Id : 369004

Question 120

Question Id : 370

Which framework provides a flexible and cost-effective approach to managing cybersecurity risks and is authorized by a global certifying body?

Answer :

Option Id

(A) NIST Compliance — 370001
(B) ISO 27001 — 370002
(C) GDPR Framework — 370003
(D) COBIT — 370004

Right Answer :
NIST Compliance

Right Option Id : 370001

Question 121

Question Id : 371

Which statement in the main function is used to indicate successful execution of a C++ program?

Answer :

Option Id

(A) int main() — 371001
(B) cout << 'Hello'; — 371002
(C) return 0; — 371003
(D) using namespace std; — 371004

Right Answer :
return 0;

Right Option Id : 371003

Question 122

Question Id : 372

What is a group of similar types of classes, interfaces, and sub-packages in Java, and can be either built-in or user-defined?

Answer :

Option Id

(A) Java Interface — 372001
(B) Java Package — 372002
(C) Java Class — 372003
(D) Java Module — 372004

Right Answer :
Java Package

Right Option Id : 372002

Question 123

Question Id : 373

What is the formula for calculating average response time in scheduling algorithms?

Answer :

Option Id

(A) Completion Time - Arrival Time — 373001
(B) First Response Time - Arrival Time — 373002
(C) Turnaround Time - Arrival Time — 373003
(D) Waiting Time - Completion Time — 373004

Right Answer :
First Response Time - Arrival Time

Right Option Id : 373002

Question 124

Question Id : 374

What term refers to a set of one or more attributes that collectively allow us to uniquely identify a tuple in a relation?

Answer :

Option Id

(A) Candidate Key — 374001
(B) Superkey — 374002
(C) Foreign Key — 374003
(D) Primary Key — 374004

Right Answer :
Superkey

Right Option Id : 374002

Question 125

Question Id : 375

Which type of semiconductor memory uses chalcogenide glass to store data by changing its state between amorphous and polycrystalline?

Answer :

Option Id

(A) DRAM — 375001

(B) SRAM — 375002

(C) Flash Memory — 375003

(D) P-RAM — 375004

Right Answer :

P-RAM

Right Option Id : 375004
